b. Property, Plant & Equipment and Depreciation

Property, plant & equipment are stated at cost less accumulated depreciation and any impairment losses.

Property, plant & equipment are depreciated over their estimated useful lives using the straight line method. The annual rates of depreciation used for the major groups of property, plant & equipment are as follows:

Building & Restoration	2%

No depreciation is provided on leasehold land.

c. Revenue Recognition

All income are recognised as and when received except for annual subscription, maintenance fee and parking fee which are recognised on receivable basis.

d. 产业消损

d. Impairment of Assets

The carrying values of assets are reviewed for impairment when there is an indication that the assets might be impaired. Impairment is measured by comparing the carrying values of the assets with their recoverable amounts. The recoverable amount is the higher of an asset's net selling price and its value in use, which is measured by reference to discounted future cash flows. Recoverable amounts are estimated for individual assets, or if it is not possible, for the cash-generating unit.

An impairment loss is charged to the statement of income and expenditure immediately, unless the asset is carried at revalued amount. Any impairment loss of a revalued asset is treated as a revaluation decrease to the extent of previously recognised revaluation surplus for the same asset.

Subsequent increase in the recoverable amount of an asset is treated as reversal of the previous impairment loss and is recognised to the extent of the carrying amount of the asset that would have determined (net of amortisation and depreciation) had no impairment loss been recognised.

	The reversal is recognised in the statement of income and expenditure immediately, unless the asset is carried at revalued amount. A reversal of an impairment loss on a revalued asset is credited directly to revaluation surplus. However, to the extent that an impairment loss on the same revalued asset was previously recognised as an expense in the statement of income and expenditure, a reversal of that impairment loss is recognised as income in the statement of income and expenditure.
e. 财政报告	e. Financial Instruments Financial instruments carried on the balance sheet include investments, fixed deposits with licensed banks, cash & bank balances, receivables and payables. The particular recognition methods adopted are disclosed in the individual accounting policy statements associated with each item.
